
Plan Overview

A Data Management Plan created using DMPonline

Title: 数据管理计划

Creator: 王 强

Principal Investigator: 王 强

Affiliation: Other

Funder: ETH Zürich

Template: DCC Template

ORCID iD: 6

Project abstract:

本项目旨在研究2023年1月1日至2026年12月31日期间，中国境内所有上市公司在数据管理方面的实践情况。项目将收集并分析200-800家上市公司的数据管理报告，其中约300-500家上市公司将接受深度访谈。项目预期产出包括一份关于中国上市公司数据管理现状的报告，以及一份关于数据管理最佳实践的指南。项目预算为75%的自筹资金和25%的政府资助。

How will you manage access and security?

Access management and security

1. Access management and security / Access management and security
2. Access management and security / Access management and security
3. Access management and security / Access management and security
4. Access management and security / Access management and security
5. Access management and security / Access management and security

Access management

1. Access management "Access - Access - Access - Access" Access management and security
2. Access management and security / Access management and security
3. Access management and security / Access management and security
4. Access management and security / Access management and security
5. Access management and security / Access management and security + Access management and security

Access management

1. Access management and security / Access management and security + Access management and security / USB Access management and security
2. Access management and security / Access management and security
3. Access management and security / Access management and security
4. Access management and security / Access management and security

Access management

1. Access management and security / Access management and security
2. Access management and security / Access management and security
3. Access management and security / Access management and security VPN Access management and security
4. Access management and security / Access management and security

Access management / Access management

1. Access management and security / Access management and security HTTPS/SFTP/VPN Access management and security Wi-Fi Access management and security U Access management and security
2. Access management and security / Access management and security Access management and security
3. Access management and security + Access management and security Access management and security
4. Access management and security / Access management and security Access management and security
5. Access management and security / Access management and security Access management and security

Selection and Preservation

[illegible][illegible]

How will you share the data?

[illegible][illegible]

Who will be responsible for data management?

DMP

What resources will you require to deliver your plan?

1. 2. 3. 1. 2. 3. IT VPN

Planned Research Outputs

Dataset - "Population of the World"

This dataset is a collection of demographic data for the world's population, covering the years 2023 to 2050. It includes information on age, gender, and education levels. The data is sourced from the United Nations Population Division and is available in both English and Spanish. The dataset is intended for use in research on population trends and development. It is a public domain work and is therefore free for use. The dataset is available in a CSV format and is approximately 200-800 MB in size. It is a good example of a large, complex dataset that is easy to use and understand. The dataset is a good example of a large, complex dataset that is easy to use and understand. The dataset is a good example of a large, complex dataset that is easy to use and understand.
